TAP:

With the expansion of the Dallas North Tollway, this brings growth and value for this major cities and towns along the northern sector of the North Texas region. This will be the major artery for residents and businesses to come. The NTTA encourages drivers even if they rarely use the tollroads to buy a NTTA tolltag. By 2024, up to 700,000 residents will be accessing the Dallas North Tollway to reach Frisco, Prosper, Celina and all the way to Grayson County.

Self:

This ad will help promote drivers to use the Tolltags to save time and money to help reach their destinations. I recently moved to Celina and saw that there is potential growth in that part of Collin County. Along with Prosper, Frisco and McKinney, this area will be in the need for massive transportation. In five years, the population within a 30-mile radius will explode to almost a million or more. It is also another reason that this could potentially pay off toll roads and become free highways.

EXPANSION OF DNT

As the North Texas population increases, so will the need for transportation. The Dallas North Tollway is the gateway to new opportunities in Collin and Denton Counties. The growth of Frisco, Prosper, Celina and many other communities has brought the DNT to extend its service past Highway 380.

In five years, residents in this area will access the DNT via Tolltag for the quickest way to destinations. Once the DNT expands to FM 428 in Celina, more business, residents and many other resources will follow to increase the population of both Prosper and Celina.

Within 10-15 years, cities in Collin and Denton counties will reach build-out up to a million people. More schools, shopping, sporting events, major corporations and houses are the reasons why more North Texans and out of towners are coming to northern part of the Metroplex.

Contact your city counsel for more information on the expansion of the Dallas North Tollway. Also the North Texas Transportation Authority can also assist in any questions you may wish to ask. The future is already beginning and the DNT is the artery towards community growth.
