TAP

In Module 2, I did a simple landscape flyer on football players and their safety. I placed two pictures on head concussion to show the audience how serious this is. The photos and text are surrounded on a green background.

Concussions happen a lot in football. Players are subject to future mental issues that could alter their behaviors. Football players past and present has faced several mental problems that resulted in injuries and/or fatalities.

It's important for football players to use helmets that provide supportive cushioning to protect whiplashing.

Football careers can be truncated in an instant without the proper training and yearly physicals. Consult with your doctor or team physican to make sure your child's head safety is top priority. Everyone wins when playing safe sports.

TOWN OF PROSPER PARKS & RECREATION

REFLECTION:

I could use a football field as a background and a border to separate the two pictures. Using better pictures could also be a beneficial factor.
